WHY ZING?

What We Deliver

A portfolio of industrial safety solutions designed for daily use in facilities where clarity, consistency, and reliability matter. From signage and hazardous energy control to PPE and customization, ZING helps teams standardize safety without sacrificing performance or professionalism.

- ✓ **PPE** including safety glasses, gloves, and protective clothing designed to be stylish, comfortable, and durable
- ✓ **Custom Imprinting** options to support your program, facility standards, or brand
- ✓ **Lockout/Tagout** devices engineered for dependable hazardous energy control
- ✓ **Safety Signage** that is highly visible, consistent, and built to last
- ✓ **Emergency Eyewash and Safety Showers** meet the highest standards of performance, reliability, and compliance

Eco-Friendly Hi-Vis Apparel

Where Safety Meets Sustainability

Why Recycled Content Matters

Hi-Vis Apparel and Sustainability

ZING provides environmentally responsible safety gear that helps minimize waste and reduce environmental impact. Using recycled materials and sustainable manufacturing practices, **ZING** empowers businesses to support a cleaner future while working toward their sustainability objectives.

ZING® Green Safety Products

Choosing **ZING** sustainable hi-vis apparel demonstrates a commitment to both employee safety and environmental stewardship. Our high-visibility garments meet strict safety requirements to keep workers safe and visible, while helping organizations embrace more sustainable, eco-friendly operations.

- **Saves Energy**
  Using recycled materials can save up to 70% more energy compared to producing new plastic.
- **Conserves Natural Resources**
  Reusing existing plastic reduces the need for fossil fuels and water during manufacturing.
- **Lowers Carbon Emissions**
  Recycled materials require less processing, helping reduce overall CO_2 emissions.
- **Reduces Waste**
  Repurposing plastic gives it a second life, extending its lifecycle & keeping it out landfills.

High-Visibility Apparel Made Simple

Everything You Need To Know

ANSI/ISEA 107-2020:

Industry benchmark defining performance requirements for high-visibility safety apparel (HVSA), ensuring compliant PPE meets visibility and safety standards.

The ANSI/ISEA standard is based on the combination of two key visibility elements. It then classifies high-visibility garments by **Type and Performance Class** based on risk level and visibility needs.

Materials:

Fluorescent Material (Day) – Enhances visibility in daylight using bright colors.

Retro-reflective Materials (Night) – Reflects light back to the source for low-light visibility.

Combined-Performance Material – Provides day and night visibility.

Types:

TYPE O	**Off-Road** – Apparel for controlled environments and non-roadway use.
TYPE R	**Roadway** – Apparel for any worker exposed to traffic
TYPE P	**Public Safety** – Apparel for emergency responders and law enforcement.
NON ANSI	**Enhanced Visibility –** Apparel for low-risk non-ANSI mandated areas such as warehouses or parking lots.

Performance Classes:

CLASS 1	Controlled traffic moving at speeds less than 25 mph.	SPEED LIMIT 25
CLASS 2	Moderate traffic moving at speeds between 25 and 50 mph.	SPEED LIMIT 50
CLASS 3	High-speed traffic moving at speeds greater than 50 mph.	SPEED LIMIT 65

V-204BIO	50/case

Sizes Available: S-5XL
Colors Available: High Visibility Lime

Designed for accelerated biodegradation in biologically active landfills. Independently tested to ISO 15985 standards, this polyester achieved **21.65% biodegradation over 90 days**, while conventional polyester showed no measurable breakdown. Results may vary based on landfill conditions and microbial activity.
