Z-FORCETM
by ZING

Smarter Safety Starts Here!

ZING® Green Safety Products is built for distributors. We know you need products that ship on time, meet your customers' needs, and give you an edge — without adding headaches.

Built for today's workforce, Z-Force™ by ZING safety eyewear doesn't just meet industry standards — it raises them. We combine top-tier protection, modern style, and sustainable design to bring you the future of safety eyewear.

Whether you're looking to expand your catalog, meet green procurement requirements, or stand out in a competitive market — ZING is your go-to partner for smart, sustainable solutions.

Protect Your Team. Protect The Planet. Choose Z-Force™.

We've Done This Before

We've been in the safety business for decades. You get reliable products and practical solutions — not guesswork.

Built For Flexibility

We offer logo custom kits, private label programs, and tailored solutions — so you can meet your customers' needs.

Sustainability Comes Standard

Recycled materials. Reduced packaging waste. Smarter manufacturing. It's built in — because your customers are asking for it.

Easy to Work With

Fast lead times. Responsive service. No red tape. We keep it simple, so you can keep things moving.

Where Safety Meets Sustainability

Protection With a Purpose

We understand that your customers demand more than just safety compliance — they expect eco-conscious solutions that align with today's sustainability priorities. That's why we developed EarthGuard™, our new benchmark for environmentally responsible products.

Throughout this catalog, the EarthGuard™ icon identifies products made with recycled content, USDA biobased materials, UL Environmental Claim Validations, and packaging designed to minimize landfill impact—giving you a clear selling point that differentiates your inventory.

Expand Your Eco-friendly Product Range

Select styles featuring sustainable materials—delivering the protection your customers trust with a smaller environmental footprint.

Reduce Packaging Waste

Our smart, recyclable cartons and low-plastic polybags help you meet corporate sustainability goals and appeal to environmentally conscious buyers.

Maintain Uncompromising Quality & Compliance

We ensure comfort and the highest safety standards remain top priority while driving greener choices.

ZING® PRINT SHOP

Our ZING Print Shop offers in-house custom pad printing on most styles—perfect for your customers to add their logos and enhance brand visibility. We offer **Free Setup**, **Low Minimums**, **Fast Turnaround**, and **Competitive Pricing** – Give Us a Try Today!

Look for this icon to customize your eyewear!

Choose The Right

Frame Styles

Frameless

Lightweight and minimalistic, frameless styles are ideal for tasks that require unobstructed views and for those who are required to wear eye protection for an extended period of time.

Full Frame

Lenses are fully encased by the frame, holding the lenses firmly in place and offering the most protection from wind, dust, and flying particles. The full frame works best to absorb and distribute impact, thus reducing the risk of the frame breaking or the lenses becoming displaced.

Half Frame

Half frame styles combine the strength of a full frame with the lightweight feel of a frameless, providing a good balance between durability and a broader field of vision.

OTG (Over-The-Glass)

Designed to fit comfortably over prescription eye glasses so there is no need to remove or replace existing glasses.

Goggles

When unobstructed vision is required, goggles are designed to provide complete coverage. Ideal for situations where splashes and flying debris are a concern.

Lens Coatings

Hardcoat/Anti-Scratch

Primarily used to enhance surface durability by offering superior anti-scratch protection.

Standard Anti-Fog

Focuses more on ensuring clear vision in fluctuating temperatures. Offers moderate anti-scratch protection.

HYDR-X Anti-Fog

Meets or exceeds additional ANSI specific testing and performance criteria for anti-fog protection.

Eye Protection For The Job

Frame Features

Adjustable Nose Pad
Nose piece is adjustable to accommodate a face or nose bridge.

Non-Slip Nose Pad
Provides a comfortable and non-slip fit for all day wear.

Adjustable Ratchet Temple
Provides up and down angle adjustment points on the temple to customize a secure, personalized fit.

Adjustable Temple Length
Allows you to adjust the length of the temples to fit different head shapes and sizes.

Co-Injected Temple
Temple design combines polycarbonate and rubber for superior comfort, durability and a secure fit for the wearer.

Foam Sealed
Low profile, closed cell foam gasket around the inside of the frame blocks out dust and debris.

Brow Guard
Built-in brow guards help to keep debris out of the eyes.

Lens Colors

Clear – Allows for maximum light transmission. Ideal for indoor use with normal lighting conditions.

Smoke – Helps to reduce glare and eye strain. Ideal for outdoor use in bright sunlight.

Indoor/Outdoor – Offers protection from both artificial lighting and sunlight. Ideal for transitioning between indoor and outdoor settings.

Amber – Filters out blue light, enhancing contrast in low light conditions. Ideal for foggy, hazy or low light settings.

Light Blue – Reduce yellow light fatigue and excessive glare.

Blue/Silver Mirror – Reflects sunlight and reduces glare. Ideal for outdoor use in bright sunlight.

Polarized – Reduces glare from reflective surfaces and enhances clarity. Ideal for outdoor use.

Sporty, frameless style provides comfort for all day wear!
