

NEW From ZING Green Safety Products!

Zing's Pull Handle Butterfly Valve Lockout provides an easy-to-use lockout solution for butterfly valves. According to OSHA regulations, energy isolation points like butterfly valves must be locked out during maintenance and repair. This device installs in three simple steps:

1. Place the cylinder over the pull handle.
2. Connect the end cap to the open end of the cylinder.
3. Lockout with a lockout padlock.

Specifically Designed for Pull Handle Butterfly Valves. Made from Recycled Materials. Easy to Install.

step 1

step 2

step 3

The device is made from durable recycled plastic and is resistant to cracking, abrasions, heat, and cold. It can be used for indoor or outdoor applications. Zing's Pull Handle Lockout Device is the only lockout device specifically designed for pull handle valves.
